Learning Objectives for the 2007 Annual Meeting

I. Prostate Cancer
   The participant will be able to:
   1. describe the clinical relevance of the PSA bounce following prostate brachytherapy and be acquainted with the spectroscopic and pathologic correlates
   2. compare and contrast the 3 available isotopes for permanent seed implants
   3. identify the role of brachytherapy as an option for the salvage of local recurrence after external beam radiotherapy
   4. compare the advantages and limitations of intra operative dosimetry
   5. evaluate the parameters of optimal preplan and postplan dosimetry, and whether the method of evaluation makes a significant difference

II. Gynecologic Cancer
   The participant will be able to:
   1. analyze the effect of MR-planning on dose prescription for IMRT, interstitial and intracavitary brachytherapy in advanced cervix cancer
   2. compare and contrast LDR, HDR and IMRT dose prescription in the management of vaginal cancer, and the limitations and indications for each

III. Breast Cancer
   The participant will be able to:
   1. describe three techniques for breast brachytherapy and compare patient selection, dose prescription, volume treated and results

IV. Miscellaneous
   The participant will be able to:
   1. identify the potential for incorporation of brachytherapy in the management of malignancies of the head and neck, brain and eye

Accreditation & Credit Statement for the 2007 Annual Meeting

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) by the School of Medicine, Virginia Commonwealth University, Medical College of Virginia Campus (VCU), and the American Brachytherapy Society (ABS). VCU is accredited by the ACCME to provide continuing medical education for physicians.

Physicians may claim up to 18.5 hours in Type 1 or Type 2 CME on the Virginia Board of Medicine Continued Competency and Assessment Form required for renewal of an active medical license.

VCU designates this educational activity for a maximum of 18.5 AMA PRA Category 1 Credit(s)TM. Physicians should only claim credit commensurate with the extent of their participation in the activity.

This continuing education activity meets the criteria of Virginia Commonwealth University and the Southern Association of Colleges and Schools. 1.8 CEUs will be awarded and recorded with the University.

For attending physicists, the ABS will be applying for CEU credits via CAMPEP.
Conflict of Interest and Off-Label / Disclosure Statement

Presenters at this conference will disclose any conflict of interest or their intention to discuss off-label use, if applicable, in accordance with ACCME Standards and FDA requirements. Conflicts of interest will be disclosed in print or in the final meeting materials.

Dr. Subir Nag, MD, FACR, FACRO, did his pre-medical studies at St. John’s Institution in Kuala Lumpur, Malaysia, graduating as the Best Student in Malaysia and the Best Athlete of the Institution in 1969. He then moved to India for his medical education at the prestigious All India Institute of Medical Sciences in New Delhi. He received his medical degree and the Gold Medal for being the Best Graduate in 1976, as well as being the Best Athlete every year. He received his residency training in Radiation Oncology from 1977 to 1980 at Montefiore Hospital in New York. From 1980 to 1981, he did a fellowship in Brachytherapy under the mentorship of Dr. Basil Hilaris at the Memorial Sloan-Kettering Cancer Center in New York. He is board certified by the American Board of Radiation Oncology. Dr. Nag has served as Chief of Radiation Oncology at the University of Tennessee at Memphis, Clinical Director of Radiation Oncology at Vanderbilt University, and as the Chief of Brachytherapy and Professor of Clinical Radiation Medicine at the Ohio State University. He has directed Brachytherapy Services for Northern California Kaiser Permanente since September 2006.

Dr. Nag is one of the world pioneers in brachytherapy and intraoperative radiation therapy. He is a past-President of the American Brachytherapy Society (1999); and, as the Chair of its Clinical Research Committee, he has been instrumental in formulating national guidelines for brachytherapy. He is the Founding Chair of the High Dose Rate Brachytherapy Working Group (HIBWOG) and the Radioembolization Brachytherapy Oncology Consortium (REBOC), and he is a Founding Member of the International Society of Intraoperative Radiation Therapy (ISIORT). A Fellow of the American College of Radiology and the American College of Radiation Oncology, he has been named in Best Doctors in America for Brachytherapy and Radiation Oncology every year since 1995. He serves as an advisor to the U.S. Nuclear Regulatory Commission (NRC), the International Atomic Energy Agency (IAEA), International Union for Cancer Control (UICC), and as consultant to several brachytherapy companies. He has received the Teacher of the Year Award from the Association of Residents in Radiation Oncology (2004-5). Author of textbooks on brachytherapy, book chapters, more than 200 scientific articles, and the American Brachytherapy Society guidelines for brachytherapy, he has presented more than 300 abstracts and lectures in brachytherapy and intraoperative radiation therapy and has organized brachytherapy symposia and workshops worldwide. He is an editor, associate editor, or reviewer for several cancer-related journals.

Dr. Nag’s practice philosophy is: “Cutting edge, state-of-the-art radiation therapy with a personalized, human touch.” His medical interests include brachytherapy, gynecological, urological, and pediatric cancers. His extracurricular interests include photography, hiking, and worldwide travel with his wife and two daughters.

It is a pleasure to honor Dr. Subir Nag with the 2007 Ulrich Henschke Award. The Henschke Award is the most prestigious award presented by the ABS in recognition of contributions made to the profession.
